Excellent. I did hear from Maureen along the way that removing exposure is their main approach. Eg taking affected wells offline. Not necessarily providing treatment.

The quote below, plus today's call, give me hope that we are near success. David Ross (AA/OW) was supposed to call Lucien today at 4 pm. I'll let you know what I hear.

Subject: FW: DOD and Testimony PFOS/PFOA

P. 18

"As of August 2017, DOD has identified 401 active and BRAC installations where there are one or more areas with a known or suspected release of PFOS or PFOA groundwater that may impact drinking water off an installation. The Military Departments are following the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) process. The DoD Components then determine whether there is exposure through drinking water and, if there is exposure, the Departments' priority is to cut off the drinking water exposure."

Susan and Alex

You may find the testimony of Lucian Niemeyer on April 18, 2018, before the House Armed Services Committee, on PFOS/PFAS on pages 18 and 19 interesting.

Peter
